ALI RAZA ANJUM

Principal Software Engineer · Full-Stack & Cross-Platform Mobile Development

Lahore, Pakistan · +92 321 4247 354 · arazaanjum@gmail.com · arazaanjum.github.io · linkedin.com/in/ali-raza-anjum

PROFESSIONAL SUMMARY

Full-stack software engineer with 10+ years building production mobile, web, and enterprise applications across fintech, real estate, loyalty, media & advertising, e-commerce, and healthcare. Specializes in cross-platform mobile delivery, API and integration architecture, and the full JavaScript / TypeScript ecosystem (React, React Native, Next.js, Node.js, GraphQL). Experienced team lead with a track record of mentoring engineers, defining API contracts across teams, leading content and platform migrations, and shipping measurable performance and accessibility improvements. Hands-on across AWS, Azure, GCP, and Firebase, with deep proficiency in mobile, backend, and modern frontend stacks.

CORE TECHNICAL SKILLS

Frontend React · Next.js · TypeScript · Angular · Vue.js · Redux Saga / Thunk · MobX · HTML5 · CSS3 · SASS / LESS · Webpack · Babel

Backend Node.js · Express · GraphQL · Loopback · REST APIs · Webhook architecture · Microservices

Mobile React Native · iOS native (Swift, Objective-C) · Android native (Java) · Ionic · Cordova · Sencha Touch

Languages JavaScript · TypeScript · PHP · Swift · Java · C# · Objective-C

Cloud & DevOps AWS (EC2, S3, Lambda, Elastic Beanstalk) · Azure DevOps · GCP · Firebase (Auth, Functions, Storage) · CI / CD

Databases MongoDB · PostgreSQL · MySQL · SQL Server · Redis · SQLite

Quality & Performance Jest · Mocha · Karma · Nightwatch · Lighthouse · Core Web Vitals · WCAG 2.1 AA · VoiceOver · NVDA

Tools & Practices Git · JIRA · Agile / Scrum · Spec-Driven Development · Team Lead & Mentoring · Estimation & Delivery

PROFESSIONAL EXPERIENCE

Mavric — Lahore, Pakistan

Senior / Principal Software Engineer — *Dec 2025 – Present*

Lead engineering on client engagements at Mavric, a digital agency partnering with consumer brands and event / media platforms across e-commerce, awards and voting platforms, and content publishing.

Hashtag Sports — Awards & Voting Platform · www.hashtagsports.com

- **Designed and built the complete awards and voting platform end-to-end** — a HubSpot CMS frontend integrated with a custom Node.js backend service powering nominations, vote submission, vote-integrity safeguards, results processing, and admin review workflows.
- **Implemented the platform's authentication layer and access controls** supporting nominators, voters, and admin reviewers, with HubSpot serving the content layer and Node.js handling stateful user flows.

Bokksu — Multi-Storefront E-Commerce Platform

- **Designed and shipped a stateless, webhook-driven synchronization system** across four distributed e-commerce instances using GraphQL mutations and event-driven webhooks, eliminating an external state store and establishing the source platform as the single source of truth.
- **Led performance engineering for a high-traffic consumer site** — conducted multi-pass Lighthouse audits, identified render-blocking scripts, LCP bottlenecks, font-chain latency, and third-party bloat, and produced a tiered remediation plan targeting sub-2-second FCP/LCP.
- **Architected a content-platform migration pipeline** from a third-party headless CMS to native platform storage with metafield-based extraction; built a Version Explorer tool for rapid theme design iteration.
- **Built a CRO analysis and redesign blueprint** targeting subscription conversion improvements.

Cross-Engagement Engineering

- **Diagnosed and resolved a silent third-party integration failure** (SmartConnect / eOne, Jira ↔ Zendesk sync) caused by header-override configuration with empty arrays; delivered a corrected service-definition JSON.
- **Authored reusable engineering practices** covering accessibility remediation, performance optimization, branch-naming and semver-driven release automation, and Spec-Driven Development.

Emaar Technologies — Dubai, UAE

Principal Software Engineer · Senior Software Engineer — *Jan 2020 – Oct 2025*

Led architecture and delivery of consumer, executive, and broker products across Emaar's real estate, hospitality, and loyalty portfolios.

- **U by Emaar (iOS + Android) —** consumer loyalty app supporting bookings and claims for dining, hospitality, and entertainment experiences, with digital membership card, points earning, and redemption.
- **Emaar One super-app & My Emaar broker app —** React Native with Node.js / Express backends and React-based admin portals; integrated Firebase, InfoBip, and analytics.
- **Executive products (Chairman Dashboard, Chairman Contacts) —** mobile applications with hardened access control and privacy isolation for the Chairman's office.
- **Cross-functional ownership —** defined mobile API contracts with backend and design; introduced Redux Saga patterns and Firebase-based telemetry as cross-team standards; ran estimation, task division, and delivery in Agile cycles.

Emirates NBD Dubai, UAE

Senior Backend Engineer *Mar 2022 – Oct 2022*

- Built Node.js / Express services backing core banking workflows with MongoDB and Redis; integrated Kibana-based observability and enterprise CI/CD pipelines.

GetBee LLC Remote

Senior Software Engineer *Dec 2021 – Jan 2022*

- Contributed to a React-based live shopping platform using Redux/Flux, Webpack, and Babel.

Devigital Systems Lahore, Pakistan

Team Lead / Senior Software Engineer *Aug 2016 – Jan 2020*

Owned web, mobile, and API architecture across multiple client engagements while mentoring engineers and establishing team-wide design and testing patterns.

- **Bokksu (Shopify) —** early development on the Japanese snack subscription platform (React, MobX, Node, MongoDB, AWS).
- **Kingston Lane —** full-stack real estate management platform (React, Node, Express, Ionic, PostgreSQL, AWS).
- **Welfie —** heart-health web and mobile platform with shared React / React Native codebase (Node, PostgreSQL, AWS).
- **Frequency Ads —** AdStudio for designing and deploying music-powered ads across streaming services (Angular, Node, PostgreSQL, S3).
- **Squabbler & Certified Mediator —** dispute-resolution iOS/Android apps with React admin portal, Redux Saga, and Firebase.
- **Get a Job —** job-portal mobile platform on React Native with Azure / Node backend.

Zepto Systems Lahore, Pakistan

Software Engineer *Feb 2015 – Aug 2016*

- Built cross-platform mobile applications using React Native, Cordova, and Sencha; collaborated on requirement analysis, solution design, and third-party API integration.

SELECTED FREELANCE WORK

Full-stack and mobile engineering for global clients across logistics, automotive, hospitality, advertising, healthcare, and consumer e-commerce. Includes headless e-commerce builds on Next.js, accessibility and Lighthouse performance remediation for DTC brands, and Ionic / React Native mobile applications. Notable engagements include Penguin Shipment, Rolzo, The Garage Lab (Ionic), MEX Motors, Adency Advertising, Bio-vet, and The Barventry (bar management).

EDUCATION

MS, Computer Science — The University of Lahore 2016 – 2018

BS (Hons), Computer Science — The University of Lahore 2012 – 2016

CERTIFICATIONS

- **Agile with Atlassian Jira** — University of Michigan · Completed during tenure at Emaar
- **Software Product Management** — University of Michigan · Completed during tenure at Emaar
- **Web Applications Development using PHP / MySQL** — Grade: A+
- **Graphic Designing** — Grade: A+
